

Exercise : Questions you have

- We have post it notes and a wall.
- Write down your top 2 questions/issues that you most want answering or advice on.
- We will try to factor these in as we go along and we will have a panel as part of the wash up session.
- You can add more as the course goes on.

- Write down three reasons for why you believe grant writing is hard.
- Discuss these in your groups and prioritise them.
- What then are the top three of your group?

Exercise : What, why, and why now

- Prepare a summary case indicating:
 - What's your BIG idea that you want funded? What are the overall goals/aims that it is trying to achieve?
 - Why should someone other than you care about it? Who benefits? What evidence is there for this?
 - Just want outlines and indications of what evidence you will provide.
- Discuss with a fellow group member.
- Would like some of you to do a plenary presentation: benefit to you => you get feedback

- For your envisaged proposal prepare a summary case identifying your investigative team (which could be just you) and why they are ideally suited to the task.
- Discuss with a group member.
- Again would like some of you to do a plenary presentation: benefit to you => you get feedback
